How to sign your FAFSA

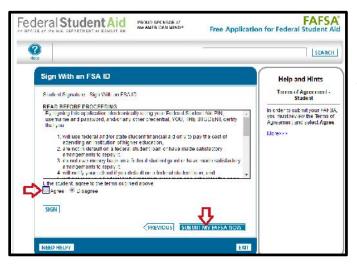

1. Log on to FAFSA.gov using the student's identifying information.

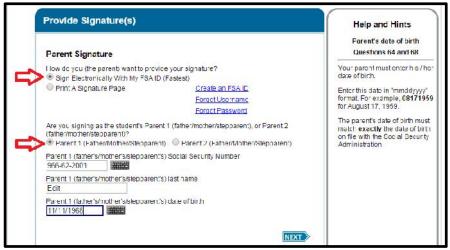

2. Click on "Provide Signatures"

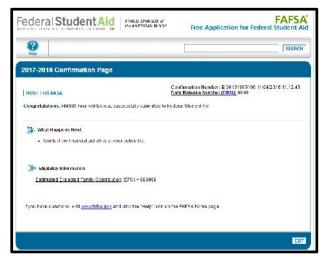

3. The next screen identifies if student or parent signature is needed. Choose the method you will use for signing. Options are shown on the right side of the screen under **Help and Hints**. For fastest results, we recommend that you "**sign electronically...**"

4. If signing electronically as the student, you will: **(a)** read the certification statement, **(b)** click "I agree" and **(c)** click "Submit my FAFSA now."

5. If signing as the parent, you must (a) identify which parent you are (matching "parent 1" with what you reported on the original FAFSA); (b) provide identifying information (SSN, name, date of birth); (c) read the certification statement, (d) click "I agree" and (e) click "Submit my FAFSA now."

6. Once you see the confirmation page, you know that the signatures have been sent on. Colleges will receive the results in 48-72 hours.
