

Move a Video in Panopto

Sunday, March 15, 2020 7:17 PM

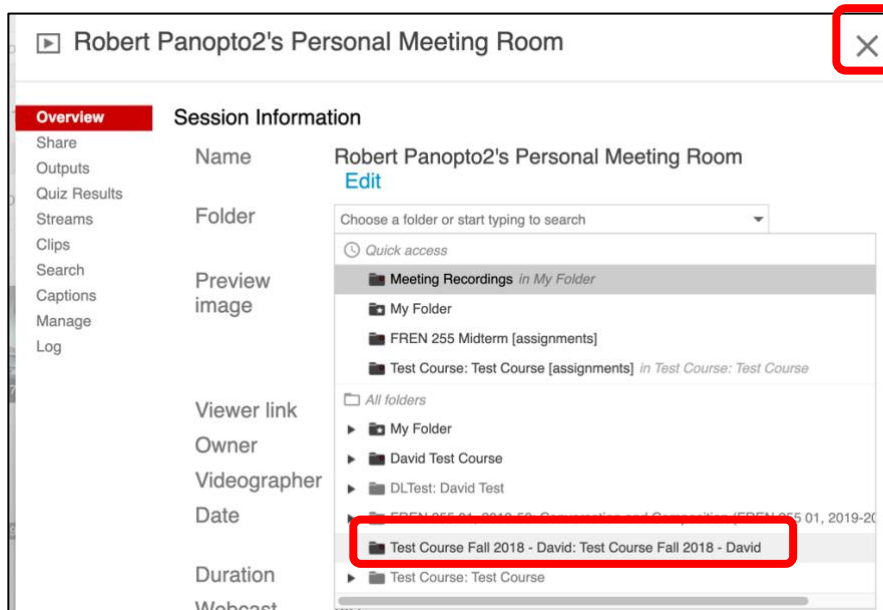

1. Move the mouse over the video, and buttons will appear, as below. Choose Settings (gear icon).

2. Under Session Information, the second line is Folder. Choose Edit after the folder name.

3. A menu pops up with all of the folders you have access to. Your course folders appear on the list. Pick your course. Then press Save, and X out of the Settings window.

The movie will now be located in the destination course folder in Panopto.

In Moodle, go to the destination course. The video name will appear in the Panopto block.
