Suggested News Articles for Biology 221 Assignment

You may choose any of these news articles or find one of your own on the subject of molecular biology.

The references below are correctly formatted in APA style for online news articles with the exception that full URLs (Internet addresses) are given for this assignment (for you and your professor’s convenience) rather than the recommended URL of the home page of the news source.

Unlike these news article references, journal articles do not include months or days in the date; instead, the title of the journal is followed by a comma and then the volume number.
