

LAKE FOREST
COLLEGE

ART AND ART HISTORY

Our studio art faculty are not only passionate teachers, but also successful working artists, represented by galleries in Chicago and Berlin. Art history professors are experts in their fields, published by the top academic and commercial presses. Studio students learn painting, drawing, video, multimedia, sculpture, photography, printmaking, and more. Our students of art history learn how to use visual material in the analysis of society, economics, politics, and religion. We are a department committed to critical thinking and creative problem solving at all levels.
