

Yammer Mobile Instructions

Yammer is a messaging app from Office 365. The web version of the app can be accessed here:
<https://www.yammer.com/mx.lakeforest.edu#/home>

For more detailed information about getting started with Yammer from Microsoft, go here:
<https://support.office.com/en-us/article/sign-in-to-yammer-d863154a-4223-4ea2-8855-ccc971321b8e>

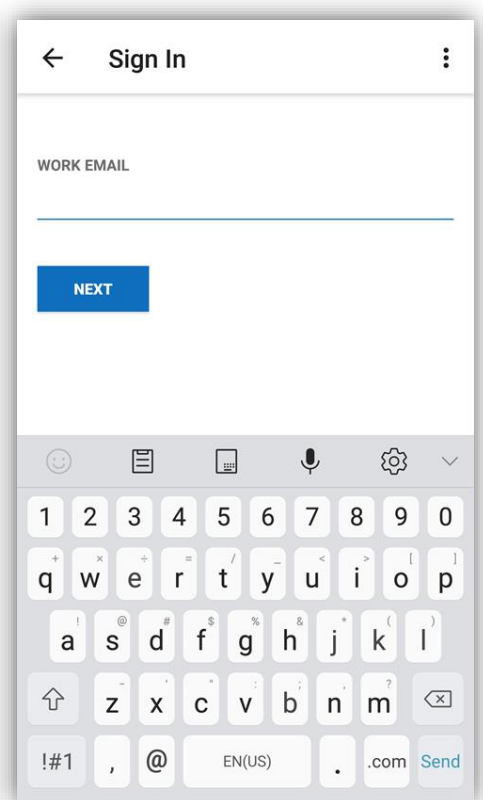

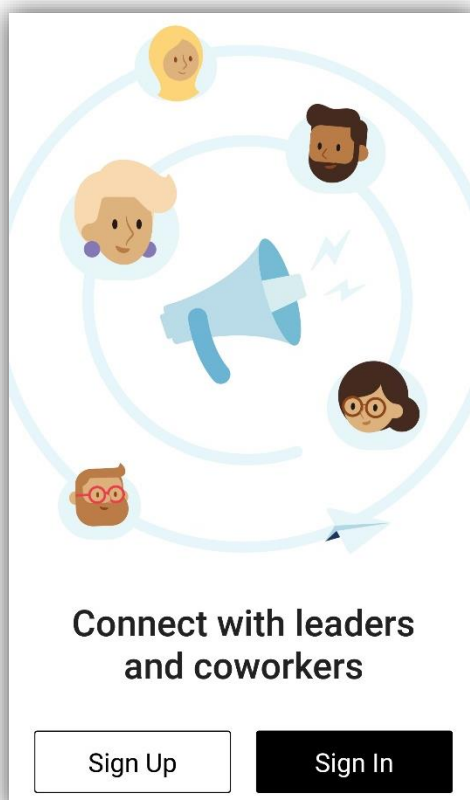

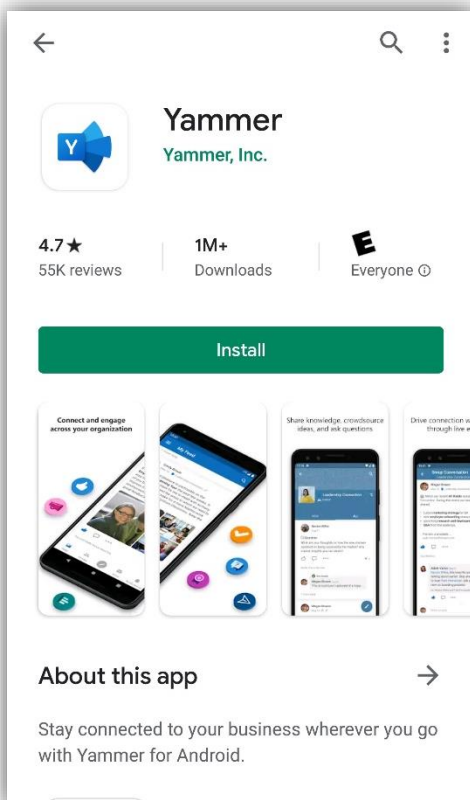

Download Instructions

Android

Download the Yammer app through the Google Play Store.

When prompted, click **Sign In**.

Enter your Lake Forest College email address with the mx and password.

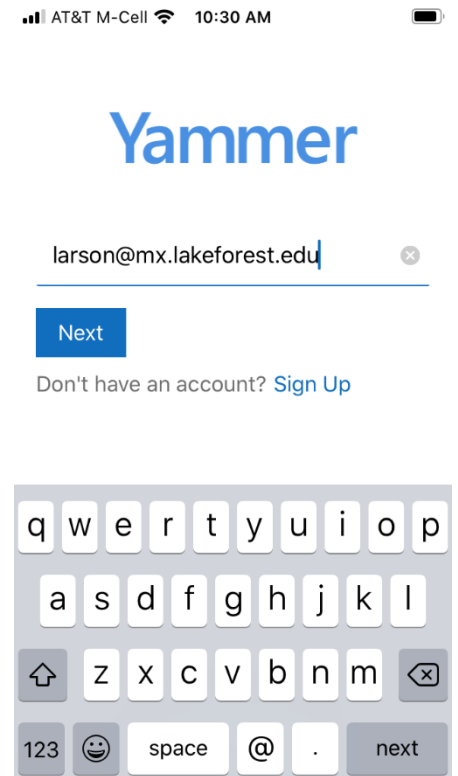

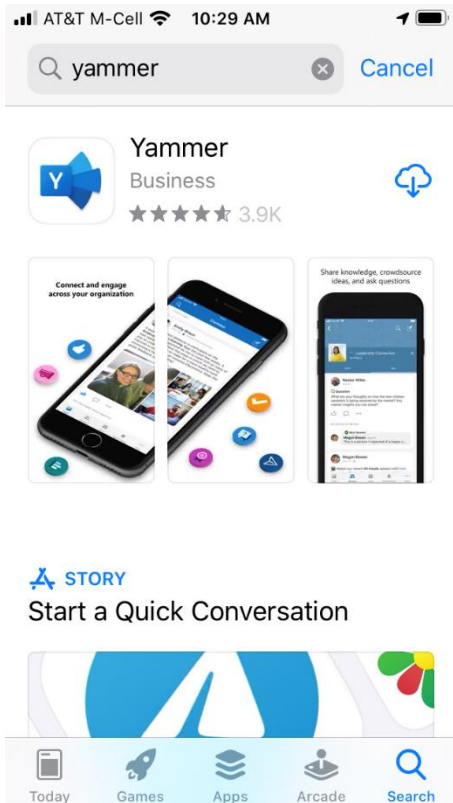

iPhone

Download the Yammer app through the App Store.

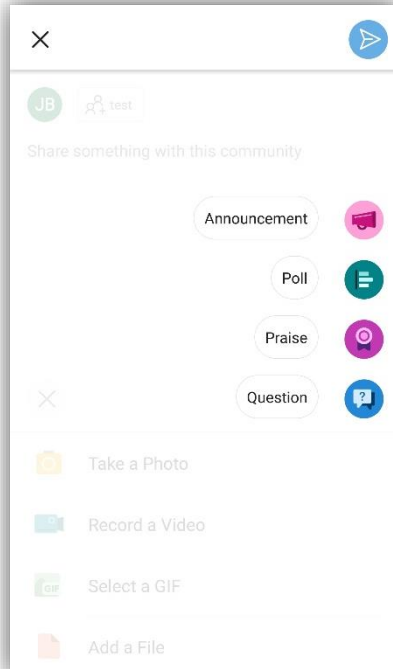

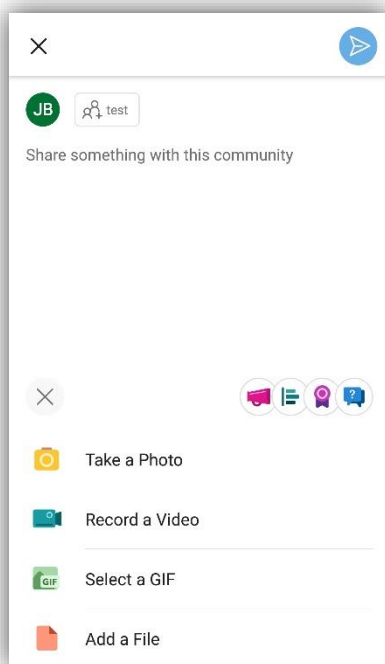

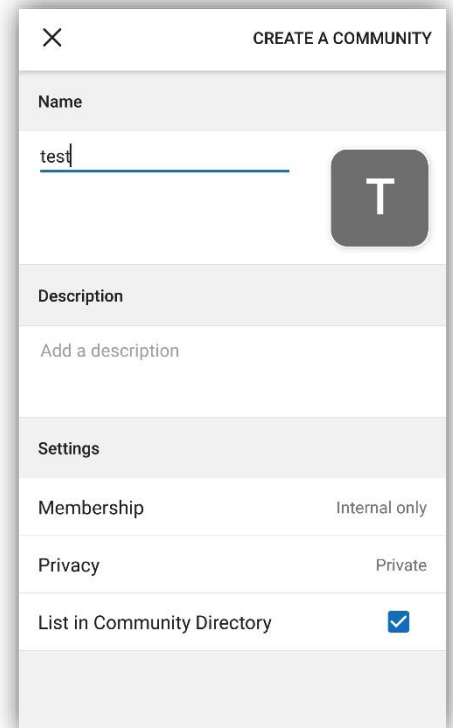

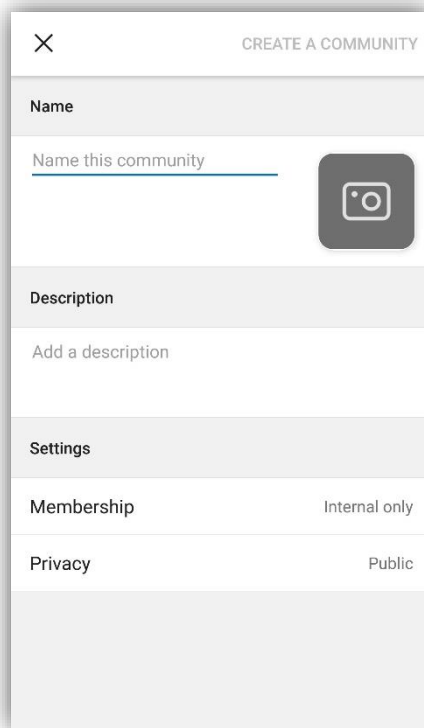

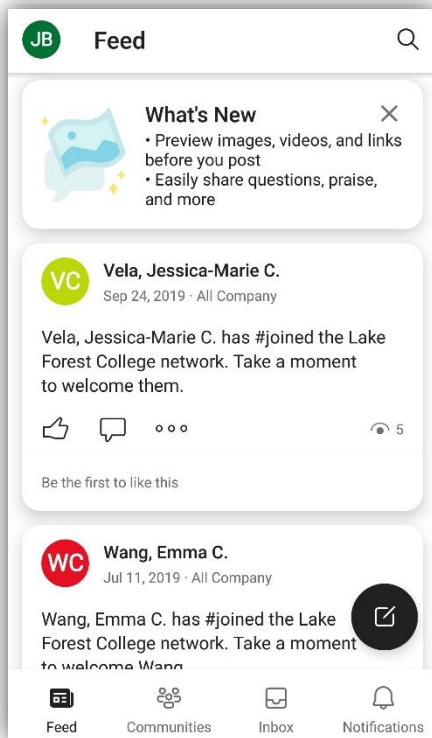

When prompted, click **Sign In**.

Enter your Lake Forest College email address with the mx and password.

The four tabs along the bottom are:

1. **Feed** – where you will see all updates from any communities you are a part of, in one feed
2. **Communities** – for group messages. You can create a new community, add an icon to represent the community group, and change the privacy settings for membership. Many message file types are supported.
3. **Inbox** – where to see new messages, including direct messages to a single person. New direct messages can be sent from either the **Feed** tab or the **Inbox** tab.
4. **Notifications** – where you will see social aspects of the community, such as when someone “likes” your message.

User Settings can be accessed by clicking your profile picture (or initials, if you have no picture for your Microsoft account) in the upper left corner of the screen on any one of the four main tabs.
