

## Guide to Posting Updates on LinkedIn

1. Log into LinkedIn. On your homepage, you'll see a window that says "start a post." Click on this to begin.

	🗹 Start a post	đ	-	
	Write an article on LinkedIn			

2. **Begin drafting your post.** In your post, be sure to describe your position title, briefly touch on what you'll be doing in your new role, thank those who have helped you secure the position, and express your excitement about your new opportunity. For help with writing, see the sample post below.

• I'm so excited to share that I will be joining the Epic team as a Project Manager! It will be an honor to work for an organization that creates software that helps healthcare organizations on a global level to improve care and reduce costs. Thank you to Maryann Hernandez (*professor, mentor, alumni, career advancement center or career advisor*) for all your support and guidance in pursuing this career. I also appreciate everything that Amanda Li (*recruiter or new supervisor/manager*) did to help me secure this great opportunity. I can't wait to start using my project management and technology skills soon at Epic!

3. You may choose to tag the people who you thank; this way, they will be sure to see your posts, and others will know that they assisted you. To tag someone, use @ and then start typing their name. A drop down menu will appear; click on the name of the person you wish to tag. Their name will then appear in bold.

Tagging also works for company names. You can also tag Lake Forest College!

4. You might also choose to add the company's logo to your post. To do this, search for the company's name on your homepage and select the company from the drop-down menu.

5. When you get to the company's website, left-click on the company's logo. From the menu that appears, select "save picture as."

6. Give the image a name like "Epic Logo" so that you can easily find it in your downloads folder. Return to your post and click on the camera icon in the bottom left corner.
